PATENT
Filed: August 2, 2001

1. (currently amended) A computer-implemented method for selectively displaying Internet advertisements, comprising the acts of:

allowing a user to choose at least one advertisement channel from an advertisement channel menu presenting plural advertisement channels;

displaying advertisements at least partially based on what channel is selected by the user;

displaying a menu of user definable advertising attributes, wherein the user definable attributes include at least one of: city, zip code, retailers, distance of travel to a retailer, retail only, or wholesale only; and further comprising:

allowing the user to create an advertisement window in which advertisements are displayed.

2, 3. (canceled).

4. (previously presented) The method of Claim 1, further comprising the act of:
allowing the user to establish the values of the user definable attributes.

5-7. (canceled).

8. (previously presented) The method of Claim 1, further comprising the act of:
displaying at least one advertisement corresponding to a user selected advertisement channel.
